

WORKING WITH FATHERS

In 2023 the Children's Partnership published a CSPR Family A. This review had a recommendation to have working with fathers as a priority.

The 2023-24 Section 11 Audit included this question

Tell us how you are ensuring the voice of fathers is heard in your work

There wasn't always evidence to give assurance about the grade chosen. Organisations did make reference to both ICON and DadPad as part of their evidence

Working with Fathers

AUDIT

A South Glos multi agency audit took place to look specifically at whether fathers and partners had been included when their child has a Child Protection plan or was Child in Need.

In all cases there was an over reliance on information from mothers

Good practice:
One Dad was included from the outset when his child was subject of a CP plan with evidence of his views recorded.
