

Laser Pens **can** **cause** blindness

Never shine a laser at an aircraft, vehicle, train, boat, cyclist, or any other type of vehicle that could affect the safety of the user.

Avoid buying cheap dangerous novelty lasers on holiday abroad, or from the internet.

Shining laser pens, pointers, or rings in a person's eyes can cause permanent damage and even blindness.

Report any dangerous laser products to Trading Standards via the Citizens Advice Consumer Service on **03454 040506**.

More advice on laser pointers (pens) can be found at <https://www.gov.uk/government/publications/laser-radiation-safety-advice/laser-radiation-safety-advice>
